Assembly of auditoriums

We offer a one-stop service with everything from conception and planning of individual lecture rooms within the exhibition or in additional halls to technical support and equipment.

Construction of display stands

*We offer individualized display stands and standard systems.
Capital Services GmbH provides conception, planning and organization.*

In-house hostess service

Choose from our pool of 350 specially trained, experienced hostesses, hosts and reception staff.

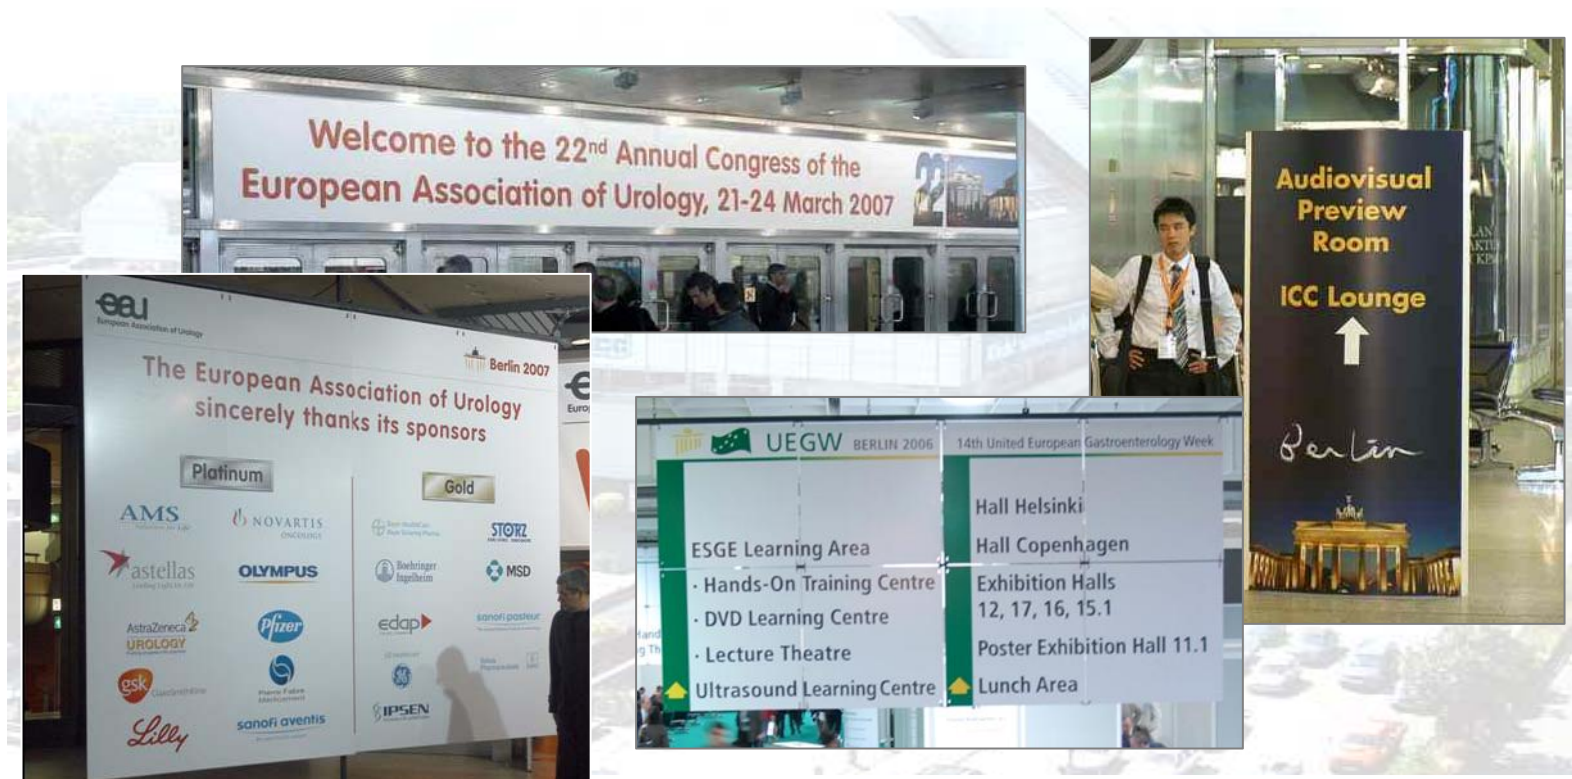

In addition to German and English we also offer many other languages such as Greek, Arabic, Swedish or Japanese.

Signage and graphic design

*Let us take care of conception, production and assembly of your visitor guidance system – we guarantee optimum results.
We also offer attractive display surfaces designed specifically for sponsors.*

Presentation management

provided by our partner

...is a data-base supported presentation management system. Presentation data is delivered via Internet, email, post or on site.

...offers additional hall information system services and a special service for symposia.

An RFID-based visitor registration tool, specially designed for CME registration, makes it possible to easily organize and communicate with groups and monitor access authorization. It forms the basis for compilation of attendance records and straightforward monitoring of room capacity.

ePoster terminals offering ideal promotional opportunities for sponsors.

C2w technology allows presentations to be published in animated form (all videos included) on the congress centre website or as a CD-DVD, accompanied by a parallel broadcast of the speaker's voice (mp3 stream) and picture.
